LEDERFUR[®] DYES

The LEDERFUR[®] dyestuffs are a range of a high quality dyes developed for dyeing the leather side in the double-face.

They present the common characteristic of a good levelling and good compatibility between all the components of the range, also in the point of view of the penetration so as the colour in the surface.

The skins dyed with LEDERFUR[®] dyes become clean and brilliant shade and very good fastness.

Application:

Leather side dye of double-face:

Relationship 1:20

Plentiful colour	Medium colour		
-	0,5	g/L	Water at 30°C Dispersan F
3,0	3,0	g/L	LEDERLICKER FL-N Run 10 minutes
1,0	0,5	g/L	LEDERFUR [®] dyestuffs Run 2 hours.
1	1	g/L	Formic Acid 85% Run 30 minutes.

May-17
