lederplusquimica@lederplus.com

PROPERTIES

COMPOSITION:	Mixture of natural and synthetic products
APPEARANCE:	Yellowish brown, pourable paste
IONICITY:	Anionic
pH OF 10%:	5 - 6
SOLUBILITY:	Readily emulsifiable: Finely dispersed emulsion.
STORAGE ESTABILITY:	Stable for 6 months when stored under suitable conditions. <i>Stir before use.</i>

USES

LEDERLICKER FL-N is a fatliquor developed as leather dyeing auxiliary that considerably improves levelling, pleasant waxy handle and glow. LEDERLICKER FL-N has a good emulsifying and dispersing effect and improves the penetration and uniform distribution of the dyestuffs. It is especially suitable for double face and suede skins. LEDERLICKER FL-N gives to velour a pleasant feel and very high brightness. Its antistatic effect is remarkable.

APPLICATION

LEDERLICKER FL-N is applied in dyeing bath 20 minutes before adding the anionic dyestuffs.

Used alone, 2 - 4 g/L (20 - 40 g/skin) are enough for double face and 3 - 6 % calculated on the dry weight for suede. However, it could be used with other compatible fats.
