
PROLAN PCX

lederplusquimica@lederplus.com

PROPERTIES

COMPOSITION:	Polyglycol ether of a sterically modified synthetic alcohol.
APPEARANCE:	Colourless, faintly cloudy liquid.
IONICITY:	Non-ionic.
ACTIVE SUBSTANCE:	20%.
SOLUBILITY:	Readily soluble in warm water.
COMPATIBILITY:	Good with anionic, non-ionic and cationic surfactants.
STORAGE STABILITY:	One year.

USES

PROLAN PCX is a very good wetting agent at room temperature with very good soil-suspending and fat dissolve power and is therefore highly suitable for soaking, wool washing and degreasing sheepskins of all kinds. For these operations is very important to have simultaneously soil-dissolving and dispersing action and at the same time, high emulsifying and wetting properties at temperatures next to 35°C. This way the product could overcome the barrier of fat and filth more superficialities, and achieve a complete penetration in the skin.

PROLAN PCX is particularly suitable for double face when besides this difficulty there is a very fatty and dirty wool.

PROLAN PCX is also suitable for wetting-back crust leathers. Because of its very good wetting capacity only low quantities of product is necessary

APPLICATION

Owing to its strong surface tension reducing capability even at treatment temperatures below 30°C it is applied for soaking in a concentration of 0.5 - 1.0 g/L with a particularly proved benefice.
