

TRUPOTAN[®] NS

neutralisation syntan

Basis:	condensation products and organic salts
Appearance:	off-white powder
Charge:	anionic
pH value (1 : 10):	approx. 5
Light fastness:	excellent
Heat yellowing:	excellent

Properties:

TRUPOTAN NS is a neutralisation syntan intended for softer shoe upper leathers and upholstery leather.

TRUPOTAN NS improves the dye levelling and assists the penetration of anionic retanning agents and dyestuffs.

Application:

Between 2 and 4 % of **TRUPOTAN NS** is recommended in the neutralisation process. **TRUPOTAN NS** can be used without the customary neutralisation agents for example sodium formate or sodium bicarbonate.

Safety and storage:

When handling **TRUPOTAN NS**, normal safety precautions associated with the handling of chemicals should be observed. For more specific details please refer to our safety data sheets.

TRUPOTAN NS can be stored for up to 24 months, if kept in a dry place.

The information given in this technical leaflet is offered in good faith and is based upon our knowledge and experience of the products used. The suitability of the products mentioned to obtain specific properties or effects are given without obligation or guarantee and should be fully tested by the end user and adapted to suit prevailing works conditions or other products which may be employed.
